NAGA

LETTER FROM THE FOUNDER

Benjamin Bilski - NAGA Founder and CEO

For journalists, editors and aspiring financial writers

Thank you for your interest in NAGA Group AG and I hope that the essence of the ecosystem we have built, and the disruption to the old and tired trading experience that we have caused, will give you the same inspiration that drives our corporation as we push toward a future of financial freedom for all.

I am an entrepreneur, and finance and tech aficionado who, about 5 years ago, realised that trading and investing was something that anyone in the world should be able to do; but in reality very few were actually able to successfully get into. More than 2 billion people in the world today are still not able to participate in the formal financial system. I've never been one to settle for the status quo, so it's been my personal mission since then to redefine the trading and investing experience to make it inclusive and accessible; to allow all people from all walks of life to quickly and easily start their financial journey at a pace that suits them; this is the vision that has been instilled in the underlying concept that fuels NAGA.

NAGA today is at the forefront of on-demand finance which has led to dramatic reform to the way people look to invest and to manage their money. We are a pioneering fintech that has created the ***world's first super app for finance and investing***; a synergistic, all-in-one solution that's radically social.

The NAGA Group AG has released record earnings in Q1 of 2020 as the company restructuring of last year has resulted in the expected turnaround in both focus and profitability. NAGA has been Germany's top performing stock this year; our active user base has tripled; our volume has quadrupled and with a 47% EBITDA. ***We have reached proof of concept and are now steadily positioned to grow.***

We have meticulously put together a kit of informative materials, which we hope will provide you with details and information at hand that you can use. Included are a ***company fact sheet*** for quick overview of key information and NAGA details; a more in-depth ***company backgrounder***, an executive bio, a set of key ***FAQs***, along with headshots and other assorted promotional materials you might need.

We will be most happy to provide you with any other information you may need and you can additionally contact me for interesting stories you are covering on these topics:

Social Trading

- Trading for everyone
- Copy trading
- Self-learning concept through social trading and financial community interaction

Blockchain and crypto currencies

- Technological potentials of blockchain
- Blockchain as an asset class and cryptocurrency markets
- Decentralisation as opportunity for countering negative banking traits
- CryptoFinance

Markets & Fintech

- Fintech and its effect on the banking and finance systems
- Market access and the importance of inclusivity and integrated solutions
- Impacts of Fintech and regulatory recourse
- Security in Fintech

Thank you for your consideration and look forward to opportunities to talk about NAGA and about the future of finance that we are actively and innovatively redefining.

Sincerely,
Ben Bilski
Founder and CEO of NAGA
